

Managed WiFi for Film & Television Production

Genstate deploys and operates production-grade networks so connectivity never becomes the thing that slows your set down. Satellite backbone, mesh coverage, on-site technician. You hand it off. We keep it running.

The Problem

Hotspots drop signal. Starlinks die 100 ft from the dish. Neither is a network. When connectivity fails, production slows, departments lose sync, and the person who "handled WiFi" takes the heat. It shouldn't be your problem.

The Solution

Genstate builds purpose-built mesh networks with satellite backbone and professional access points. An on-site technician manages everything from setup to teardown. Seamless coverage from basecamp to the furthest camera position. No dead zones. No dropouts.

How It Works

Satellite Backbone

Starlink-powered uplinks provide internet anywhere. No cell towers needed. Bonded connections available for higher throughput.

Mesh Coverage

Professional access points placed throughout your set. Seamless coverage that moves with your crew. No dead zones.

On-Site Operations

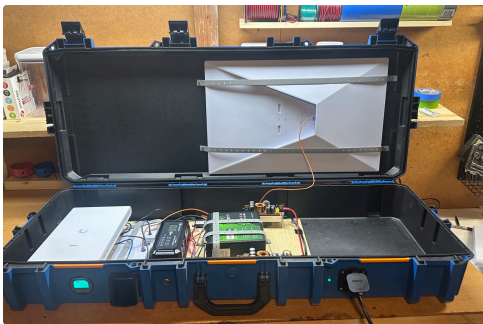

A Genstate technician handles setup, relocation, and troubleshooting in real time. Every shoot day. Your name stays off the problem.

SETUP ON SET

Zero
DEAD ZONES

24/7
ON-SITE OPS

Engineered from scratch — mesh networking, battery backup, one sealed case.

Any terrain. Any weather. Deployed in minutes.

Goes where the shoot goes. Broadcasting from a mountain summit.

Engagement Models

Day Rate

Single shoot days, pickup days, or second unit. Full setup and on-site tech included.

Multi-Week

Block shoots, episodic runs, or extended location work. Scaled to your schedule.

Full Season

Dedicated infrastructure, ongoing operations, and priority support for the full run.

"Genstate delivered exactly what we needed: seamless connectivity, intelligent security, and reliable power — all bundled into one integrated, rock-solid system. It not only helped us stay on schedule — it saved us a substantial amount of money."

Hans Dayal · Production Manager, Netflix Alberta
